

# Sunshine GardenHouse™

## Hobby Greenhouse Kits now available from AHL!

The Sunshine GardenHouse™ is a high quality greenhouse kit that is easy to assemble and fun to use. Extend your outdoor growing season, start seeds and cuttings, or grow fresh flowers and vegetables year round! The attractive, durable GardenHouse™ will add value to your home. The greenhouse kits include panelized components for easy assembly. Only a power screwdriver, 6 ft. stepladder, and measuring tape are required for installation. Most sizes take less than a day to construct, even for “non-builders.” The GardenHouse™ is packed in boxes with a maximum weight of 85 lbs. Any one of the kits will fit into a standard size pickup truck without a canopy. In surveys of current GardenHouse™ owners, 94% thought the kit was easy to build. And an overwhelming 99% of owners report being satisfied or very satisfied with their GardenHouse™!

### QUALITY FEATURES OF THE SUNSHINE GARDENHOUSE™

- **Polycarbonate panels** are virtually unbreakable. Impact strength is 20 times greater than acrylic panels and 200 times greater than glass panels.
- **Double-wall panels** provide optimum insulation to retain heat in winter and reduce heat in summer.
- **Automatic vent operators** on the roof and base are included on most models. They require no electricity or batteries and help with cooling and crucial ventilation.
- **Redwood frame** (from second-growth redwood forests) is naturally resistant to insect and moisture damage. It will not warp in moist or dry environments and does not require chemical treatment.
- **Patented frame connectors** withstand wind loads of 85 mph with no damage to the greenhouse.
- **Recycled plastic frame base** is impervious to rot, mildew and insects.
- **No foundation is required** due to the exceptionally rigid design. Simply place the Sunshine GardenHouse™ in a level location and anchor the corners to the ground.
- The **45° roof slope** transmits low angle sun in winter and reflects high angle sun in summer. The steep roof sheds snow in winter and will withstand a snow load of 18 lb. per square foot.
- **Five-year warranty** on the entire GardenHouse, and ten-year limited warranty against panel discoloration!
